DETAILED ACTION

Allowable Subject Matter

Claims 1-22 are allowed. The following is an examiner's statement of reasons for allowance: The claims are allowable over the prior art of record because the teachings of the references taken as a whole do not teach or render obvious the combination set forth, including that of a set of handcuffs having a pair of bracelet sections, linkage means tethering the bracelet sections together, and a restraint mechanism connected to the linkage means, where the restraint mechanism having means for preventing the bracelet section from being rotated to a previous angular position, about a linkage axis, in a second rotational direction opposite from a first rotational direction once a succeeding angular locking position has been assumed (claim 1, lines 11-14; claim 9, lines 9-13).

The closest prior art, U.S. Patent Number 2,388,766 to Ruttiman, discloses a set of handcuffs with a pair of openable bracelet sections each of the bracelet sections includes a locking mechanism, a linkage means for tethering the bracelet sections together, and a restraint mechanism connected to the linkage means, where the restraint mechanism permits a bracelet section to be rotated about a linkage axis. However, Ruttiman does not disclose the restraint mechanism having a means for preventing the bracelet section from being rotated, about the axis of the linkage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
